LOOK. LISTEN. LEARN.
Be aware.
Fire can happen anywhere.
The National Fire Protection Association states that 4 out of 5 U.S. fire deaths occur in the home. Look, Listen, and Learn how you can prevent deadly fires.

LOOK
Top three causes for home fires:

1. Cooking Equipment
   Cooking accounts for 47% of fires, and 20% of fire related deaths

2. Heating Equipment
   Heating accounts for 15% of fires and 19% of fire related deaths

3. Electrical
   Electrical accounts for 9% of fires, and 18% of fire related deaths

LISTEN
2/3 of fire deaths occur in homes with missing or non-functioning smoke alarms

Remember to:
- Test smoke alarms monthly
- Change battery yearly
- Replace alarm every 10 years

Install smoke alarms in:
- Every bedroom
- Outside every sleeping area
- On every level of your home, including basement

LEARN

1. Learn two ways out of every room.
2. Have a qualified electrician inspect your electrical system every 10 years.
3. Have a qualified electrician install AFCI breakers and receptacles.
   The CPSC estimates that 50% of electrical fires can be prevented with AFCIs.
4. Extension cords can cause an estimated 3,300 home fires a year.
   Never use them as permanent wiring.
