ALWAYS LOOK UP, ALWAYS
POWER LINES ARE A LEADING CAUSE OF ELECTRICAL FATALITIES

Between 2011 and 2018, 38% of all electrically related workplace fatalities were caused by **overhead power lines**. In the majority of these cases, fatalities occurred in occupations with little to no electrical safety training. So when you’re on a job site, **always look up, always** – it can save your life.

**IF A VEHICLE OR OBJECT CONTACTS A POWER LINE OR UTILITY POLE**

- Consider **all lines** to be live and dangerous.
- **Tell others** not to approach vehicle, downed lines, or anything that may be in contact with downed lines.
- Warn others to stay at least **35 feet away**.
- Stay in place or inside your vehicle unless you see **fire or smoke**.
- **Call 911**.

**IN THE EVENT OF FIRE OR SMOKE**

- **Do not touch** the ground and vehicle at the same time.
- Jump from the vehicle with your **feet together**.
- **Shuffle away** and avoid lifting your feet.
