

GROUND-FAULT CIRCUIT INTERRUPTERS

PREVENTING ELECTROCUTIONS SINCE 1973

Since the first introduction of GFCIs in homes, there has been an:

83%
D**ROP** in electrocutions

95%
D**ROP** in electrocutions from consumer products

The Consumer Product Safety Commission estimates that:

47%
of current electrocutions could be prevented with proper GFCI protection

50%
of American homes were built before the introduction of GFCIs

There are potentially **43 MILLION** American homes without GFCI protection

WAS YOUR HOME BUILT BEFORE 1976?

Have a qualified electrician inspect your electrical system to ensure it's up to code.

THE IMPORTANCE OF A QUALIFIED ELECTRICIAN:

Licensed to work in your state.

Most states require continuing education for electricians to ensure the continual quality of work.

Qualified electricians are trained on the National Electrical Code – the minimum safety standard for electrical work.

Qualified electricians have 500–750 days of on the job apprenticeship training and 144 hours of classroom training before they are licensed to work on your home or business.

MAJOR GFCI CHANGES IN THE NATIONAL ELECTRICAL CODE

CURRENT REQUIREMENTS IN THE 2017 NATIONAL ELECTRICAL CODE

BATHROOMS	GARAGES	OUTDOORS	BALCONIES, DECKS, AND PORCHES	KITCHEN COUNTERTOPS	WITHIN 6 FEET OF SINK	LAUNDRY AREAS	WITHIN 6 FEET OF BATHTUB OR SHOWER
