Home Electrical Safety
Always Look Up Always

Before starting any project, be alert of where the power lines are located, and know how high they are hanging. Whether you’re working on the roof, trimming trees, or painting your siding, it’s your job to be aware and to alert others about nearby power lines.

1. Locate all overhead power lines.
2. Stay at least 10 feet away from all overhead power lines.
3. Do not touch anything in contact with power line.
4. Carry ladders and equipment horizontally.
5. Stay at least 35 feet away from downed power lines and call 911.
