

INSTALLING ELECTRIC VEHICLE CHARGERS

HOW TO PREPARE YOUR BUSINESS

Are you interested in installing electric vehicle chargers at your building or place of business? Adding type 3 charging can attract new business or provide an incentive to employees while showing your social corporate responsibility. Type 3 chargers provide 60-80 miles of range in 20 minutes. Installation typically ranges from \$30,000 - \$75,000.

EV CHARGING SAFETY

CORD MANAGEMENT

Prevent charging cord damage by keeping cord on its holder and tucking away excess length while charging

REPORTING DAMAGE

Report any charging cord damage to appropriate personnel

TESTED CHARGING EQUIPMENT

Ensure charging equipment has been rated and listed by a Nationally Recognized Testing Laboratory such as UL, CSA, or ETL

EV CHARGING ETIQUETTE

TIME LIMITS

Establish time limits on chargers to ensure efficient use of chargers. Remind users of time limits

MULTIPLE USERS

Prohibit users from disconnecting other user's electric vehicles. Establish a protocol for users who pass their allotted time on a charger

IMPROPER USE

Remind users of the importance of charging safely. Ensure users store charging cord properly by providing signage for proper storage

ELECTRIC VEHICLE CHARGING TYPE 3 CONNECTORS

Type	CCS	CHAdeMO	TESLA
			
Vehicle Makes / Models	GM, Ford, Chrysler, Dodge, Jeep, BMW, Mercedes, Honda, Kia, Hyundai, Volvo	Nissan LEAF, Mitsubishi Outlander PHEV	Tesla Only

CHARGE TO CHARGE?

- Payment and payment methods are decided by charging station owner
- Requiring payments may help recover equipment and usage cost
- Options include charge per kWh used, time parked, or a flat fee
